Question

What is the effect of "Skip Section" link in OPAC interface?

```
/exlibris/aleph/unn_1/alephe/www_f_eng
```

```
head-1-bor:<A HREF="#skip-section" class="hidden">Skip Section</A>
```

```
head-1-bor-bll01:<A HREF="#skip-section" class="hidden">Skip Section</A>
```

```
head-1-nobor:<A HREF="#skip-section" class="hidden">Skip Section</A>
```

```
head-1-nobor-bll01:<A HREF="#skip-section" class="hidden">Skip Section</A>
```

Answer

The #skip-section" lines were implemented with rep_change 2011 (accessibility project) in Aleph 21. The Opac had been adjusted for screenreaders, meaning for software that makes the screen available for blind and visually handicapped persons.
