
Count of titles held by our library. Unique titles?

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Description:

How can we find the number of titles for our library? How about unique titles?

Resolution:

As described in KB 4088, the following SQL gives you the number of non-deleted titles:

```
abc01@ALEPH20> select count(*) from z13 where z13_title is not null;  
**** Hit return to continue ****
```

```
COUNT(*)
```

```
-----
```

```
2058177
```

If you are a consortium and you have multiple bib records for the same title, the following SQL will give you the number of unique titles:

```
abc01@ALEPH20> select count(unique z13_title) from z13;  
**** Hit return to continue ****
```

```
COUNT(UNIQUEZ13_TITLE)
```

```
-----
```

```
1912861
```
