

Change E-mail Address for Retrieving Failed E-mails

- **Article Type:** General
 - **Product:** MetaLib
 - **Product Version:** 4
-

Desired Outcome Goal:

Change the e-mail address for retrieving failed e-mails

Procedure:

1. Edit the configuration file

```
> cd $metalib_conf
```

```
> vi metalib_start
```

put the correct e-mail address after the "setenv email_sender" parameter and save
(when this parameter is empty, then the default e-mail address is metalib@<localhost>)

2. Run:

```
> source metalib_start
```

```
> metalib_conf_create
```

```
> start_w
```
