

p-com-03 reports deleted records as updated.

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 19.01
-

Description:

The p-com-03 service - "Report of New and Updated Catalog Records - by Cataloger" - reports deleted records together with the updated records. Managers should know how many deleted records by Cataloger there are.

Resolution:

The p-com-03 service reports New and Updated records, while deleted records are also counted as updated.

p-com-03 is based on the z106 records, and is not designed to report deleted records separately.

This issue is still open and was escalated to the Documentation team for documentation correction <2010-05-23 01:00:04>.
