

## Does owning library impact location limits in WebVoyage?

- **Product:** Voyager
  - **Product Version:** 7.1.1
- 

### Question

We are going to be changing the owning library for our bibs. Will that impact location filters in OPAC?

### Answer

No. Owning library impacts the Voyager backend (i.e., operator permissions for editing those records), but location limits in WebVoyage reference the location in the holdings record (MFHD).
