

## Hyphens in 001/003 (035) changed to blanks.

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 16.02
- 

### Description:

The fix\_doc\_create\_035\_1 program is changing hyphens in 001/003 (which becomes the 035) to blanks. Why?

### Resolution:

The stripping of the "-" and "#" is hard-coded in the program. Maybe you could change "-" to something else and then change it back afterwards(?)
