

New password created but unable to catalog

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 21
-

Description:

I made a new password called ??? but it cannot catalog.

I added the user to permission.dat via the tables navigator. It has permissions to catalog.

Why can't it catalog?

Resolution:

After any file in the directory pc_tab/catalog is changed UTIL-M-7 must be run. If you prefer not to enter the server you may run util M 7 via the

Cataloging Module services. Choose Services > General > Update Tables Package (in v16).

Additional Information

Version 16, adding new cataloger
