

## How to Configure Hebrew Display in GUI

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 18.01
- 

### Description:

When I am in Circulation module and view readers, I can not see the Hebrew in their names.

Also, when I am in the Cataloging module, I can enter Hebrew in the Cataloging record but I can not enter Hebrew when I do "scan" or "search".

I click the icon of the drawer or the binoculars and switch my Windows to Hebrew, but when I type Hebrew, I see only what looks like Greek.

### Resolution:

Do as follows in Windows: Start > Settings > Control Panel > Regional and language options.

In the tab "Regional Options", choose "Hebrew" and "Location Israel".

In the tab "Advanced" choose "Hebrew".

Reboot PC

---

## Additional Information

Hebrew, display, windows XP
