## Specifying closed holidays in GUI Circ - Loan "Open Hours"

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 18.01
- 

### Description:

In the GUI Circ - Loan "Open Hours" screen, when we specify our summer hours (Open 9-5, Mon-Fri., June-August) and specify July 4 as a Closed date, the system still lets books come due on July 4.

The same is true of Christmas day -- which is a closed day within the changed hours for our Christmas break.

### Resolution:

The Loan "Open Hours" screen updates tab17. With v20 rep\_change 3183, it breaks the June-August into three lines, and has this:

```
####06##  
####07##  
####08##  
####0704
```

The ####0704 line in tab17 must be \*before\* the ####07## line. (If the ####07## is first, the system reads it first and treats all July days as Open.)

In order to make ####0704 be first, you need to do:

From: To:

```
June Open 09:00 05:00  
July August Open 09:00 05:00  
July 04 Closed
```

If you then look at tab17, you will see that you now have:

```
####06##  
####0704  
####07##  
####08##
```

-- which is what you want.

KB 16384-22210 describes a related problem.
