

TXT full text indexing for ADAM

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 18.01
-

Description:

I have defined TXT as a “Full Text Index” for ADAM digital objects.

But, for some reason, when I search for it in GUI and web it does not work.

When trying to figure out why it is not working I noticed that in the GUI Aleph “thinks” I am looking for “Words = TXT whatever” instead of “Full Text = whatever”.

Resolution:

see attached

Additional Information

ADAM full text indexing TXT
