
856 field in full view web OPAC not displaying as expected.

- **Article Type:** General

Description:

The 856 field in our full view does not display as it did in V15. I added an 856 Simple link to the edit_doc_999.eng to at least see the 856 link, but the 856 "M" link style does not work as it did in V15. What do we need to change?

edit_doc_999.eng

```
## 856## D LM Link Y M E W
```

```
## 856## D LSimple Link Y S E W
```

tab_buf_z403

```
BUILD get_buf_z403_bib 856##,,y,*,Y,
```

```
BUILD get_buf_z403_bib 856##,,y,-,U,
```

edit_field.eng

```
1 # 856## U
```

```
2 u A ^
```

```
!
```

```
1 # 856## Y B
```

```
2 z A ^
```

```
2 y A ^
```

Resolution:

[From Amy Helfman, Brandeis U. via the ALEPH-NA list:]

With input from a co-worker, I just devised this CSS solution to the appearance of the URL icon in the 856 field on the full record screen. In our stylesheet, I have a unique class defined for the right-hand column of the full record display, td1hw. Adding this line:

```
td.td1hw a img {display:none}
```

suppresses appearance of the icon in the external link.
