

Keyword Indexing in Holdings Library: zero hits

- **Article Type:** General

Description:

I started setting up tab11_word in the holdings ABC60.

Our main goal was to get access to the various notes we have in the holdings records for the 852, 856, 866, 952, and 590.

I have a single keyword index for words in notes I have called HWRD.

I updated pc_tab-sear.eng so I could do the search. I am getting zero hits.

I did util/f/1/28 in the ABC60 for holdings record.

The keyword indexing seems to be there.

What's missing from how we have set this up?

Resolution:

See SKB-16384-13346 :

The problem had to do with the setup of tab00.eng.

You must have a WRD W-001 index in tab00.eng:

H WRD W-001 00 01 Words

(Keywords: word indexes keyword)
