

How to add a mail receiver in JavaMelody

- **Article Type:** General
 - **Product:** Voyager
 - **Product Version:** 7
-

Desired Outcome Goal:

Add a mail receiver to receive JavaMelody report.

Procedure:

1. Log in to the server as voyager.

2. cd /m1/voyager/xxxdb/tomcat/conf.

3. Edit server.xml.

4. Look for the following section:

```
<Resource name="mail/MySession" auth="Container" type="javax.mail.Session"
```

```
mail.smtp.host="mail.exlibris.co.il"
```

```
mail.smtp.user=""
```

```
mail.smtp.password=""
```

```
mail.from="noreply-xxxxb.vxws@example.com"
```

```
/>
```

5. Add the following statement below the section in step 4. with value equal to receiver ID:

6. Go through step 4 and 5 until the end of server.xml.

7. Restart tomcat.

```
<Parameter name='javamelody.admin-emails' value='receiver@xxxx.com' override='false'/>
```
