
What is purpose of ChargeTimeout= in voyager.ini?

- **Article Type:** Q&A
 - **Product:** Voyager
-

Question

What is the purpose of ChargeTimeout= in [Circulation] stanza of voyager.ini?

Answer

ChargeTimeout= value determines how long Charge window remains open with no activity. This clears patron information from the screen after interval passes to ensure patron information not left unattended on workstation screen.

Additional Information

Value is set in voyager.ini on each workstation, so may vary between workstations.
