

Locating in-transit items

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Description:

How to retrieve a record in transit? Which oracle table is this?

Resolution:

When an item is put in transit to a different sublibrary, a z36 transaction is created. The z36_id is the sublibrary code.

Also, the z35_event_type will be "56" (Transfer loan).
