

missing stanzas in acq.ini

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 16.02
-

Description:

acq.ini seems to be missing several stanzas, at least according to what I see in the web guide.

According to the guide, we are missing the following stanzas: [General], [ItemList], [CheckInList], [SubscrList], and [SerialClaimList].

There is also an additional stanza [FirstTab] that is not mentioned in the guide. I would gladly copy these stanzas in from our ExLibris test version, but they aren't in that version either.

Please send us the stanzas and potential values or advise on what to do. (This came up because we wanted to turn off the the SerialActivityLogArrive).

Resolution:

The stanzas are included in the GUISSYS.INI files instead of ACQ.INI file (in this case there is an error in the Guide)

Additional Information

acq.ini, stanzas, guisys.ini
