

## trigger 'xxx50.Z105H\_TRIGGER' is invalid and failed re-va

- **Article Type:** General
- **Product:** Aleph
- **Product Version:** 19.01

---

### Description:

The client hangs while trying to catalogue a new item. Below is the log.

I will begin my investigations, but thought I would report right away, in case you have a quick fix...

```
SERVICE : C0402
MODULE : Circulation Services
DESCRIPTION: Catalog a New Item - Minimal
ACTION : WRITE-CRS
PROGRAM : pc_cir_c0402

```

Oracle error: io\_z105\_write

ORA-04098: trigger 'MGU50.Z105H\_TRIGGER' is invalid and failed re-va

Resolution:

As can be seen in the mgu50 \$data\_scratch/file\_list, the z105h tab and trigger \*are\* being included (from the \$aleph\_root/tab/file\_list.z105):

TAB z105h 100K 0K ts0

TRI z105h\_trigger

There was a similar existing SI which I have made into a KB record (16384-16193).

We see that, though the z105h\_trigger exists, the z105h table does not. There are two possible solutions:

1. Do util a/17/1 for the z105h in the \$z105\_library to define the z105h. Or
2. Drop the table and trigger:

```
SQL> drop table z105h;
```

```
SQL> drop trigger z105h_trigger;
```

and add these lines to the \$z105\_library \$data\_root/file\_list:

```
NA z105h
```

```
NA z105h_trigger
```
