
Institutional Settings Grayed out - No Access to Cluster Component

- **Article Type:** General
 - **Product:** MetaLib
 - **Product Version:** 4
-

Description:

We're trying unsuccessfully to access the cluster component in the management interface with account library-eng. We can't access "Institutional Settings" to update "Cluster-Facet Tab" because the "Institutional Settings" option is grayed out.

Resolution:

In order to access the institution settings, a user has to be a "super user". This is assigned through the tab_management file on the server as follows:

- 1) dlib dat01
- 2) dt
- 3) vi tab_management
- 4) In the third column, change the "Y" to "S" for those users you wish to have institutional administrator rights

Now you should be able to check access the Cluster-Facet tab, etc.
