

Item loan status on Full record display

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 18.01
-

Description:

How can we get the item loan status on the full record page rather than requiring the patron to click through to the item page?

Resolution:

ITM+ can be put in `$data_tab/www_tab_short.eng` in order to show the total number of items in each sub library and how many of each item is on loan. This will appear in the "short" tabular view.

ITM+ is NOT supported in full view.

ITM+ can not be put in `$data_tab/edit_doc_999.eng`.

This has been confirmed after consultation with the programming staff on Feb. 18, 2007, specifically in the program `$alephm_source/www_f/www_f_edit_doc_999.cbl`.

Additional Information

item loan status, full record page, item page
