
HTMLHelp=Y, bin_v, and help_v in version 19

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 19.01
-

Description:

I see that the "[Help]" section has been removed from the version 19 ./ALEPHCOM/TAB/alephcom.ini.

[Help]

HTMLHelp=Y

Why was it removed? It was added in the last SP we applied to v17.

The .\alephcom\bin_v and .\alephcom\help_v directories which were likewise added in version 17 is gone. Do I still need to copy the current .\alephcom\bin as .\bin_v and .\alephcom\help as .\help_v or is this no longer necessary?

Resolution:

Beginning with version 19, there is only one version of online help (v). Therefore the HTMLHelp is not relevant, and there is no need to copy the \bin as \bin_v or the \help as \help_v.
