## p\_manage\_07: Z00R for Holdings; unlocking library?

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 18.01
- 

### Description:

We are planning to create z00r for our ABC60 holdings library. As run, p\_manage\_07 locks the ABC60 library while this is being created. But is that really necessary? Can we unlock the database after getting p\_man\_07 started, allowing searches in the OPAC to continue while the z00r table is being built?

### Resolution:

Yes, you can unlock the abc60 library after you submit p\_manage\_07 for abc60 -- as long as no updates are being made in the GUI to the abc60 z00 table.

If ue\_01 runs in the abc60 library, you should do util w/5 to toggle UE-01 Down before unlocking the abc60 library.
