

MetaLib's log files: description

- **Article Type:** General
 - **Product:** MetaLib
 - **Product Version:** 3
-

Description:

What are the main MetaLib log files?

Resolution:

1. `www_server_m_433N.log`:

This log file captures all requests made to the `www_m_server` s by users, both end-users and staff accessing both the `/V` and `/M` interfaces.

2. `search_server_433N.log`:

This log file captures all searches handled by the search servers

3. `z39_gate_733N.log`:

This is the z39 gate log file that captures requests sent to the z39 gate and logs steps taken by the z39 gate in attempts to search and fetch records from remote targets.

4. `pds_server.log`:

New in MetaLib version 3, this PDS log file captures requests made to the PDS with detailed information and a time stamp.

Additional Information

MetaLib, log, logfile, web server, `www_server_m`, `pds_server`, `z39_gate`, PDS, Z39
