
p_manage_17: FUNCTION ERROR; "Execution error : ../io_z0102.gnt"

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 16.02
-

Description:

p_manage_17 ends with a suspension.

The \$data_scratch/p_manage_17.err file points to p_manage_17_a_4.log, which has this:

```
38038 READING ACC 009607633
```

```
FUNCTION ERROR
```

```
FUNCTION ERROR
```

```
FUNCTION ERROR
```

```
<etc.>
```

```
Execution error : file '/exlibris/aleph/a16_3/aleph/exe/io_z0102.gnt'
```

```
error code: 115, pc=0, call=26, seg=0
```

```
115 Unexpected signal (Signal 4)
```

b_manage_17_a: Retrieve Failure

Resolution:

We were unable to determine the cause of this problem, but apparently it was temporary because a re-run of p_manage_17 the next evening *was* successful.

(See KB 16384-4369 for how to determine if p_manage_17 was successful.)
