

Terms not showing up in the Headings List

- **Article Type:** General

Description:

We are seeing that some terms are not showing up in the headings list for xxx10, our main authorities library. When we try to link a term in a bib to an authority record, we are not seeing the term in the headings list.

We highlight the bib term, press Ctrl-F3, and are brought to the xxx10 list. The term is not there. Can you help us troubleshoot? The term in the example is not a newly added authority record.

Resolution:

This is occurring because of the configuration of tab11_acc table in xxx10. This is the relevant entry there:

```
110## 5 COR -5wi
```

The 5 in column 3 is a subfield filter and there is no subfield \$5 in the record. I Remove the 5 in column 3, restart the pc_server and ue_01, save the authority record to the server and see if it indexes.
