
Service Pack install error: cannot open ../lib/ldflags

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 16.02
-

Description:

I implemented the 1690 service pack and got the following errors:

```
iprou: test_comp check_iprou
check_compile_c.c
compile_cc: test_comp check_compile_c
cat: cannot open /aleph/app/oracle/product/920/lib32/ldflags
compile_cc: test_comp check_compile_cc
cat: cannot open /aleph/app/oracle/product/920/lib32/ldflags
compile ora: check_compile_ora.pc
```

Resolution:

To avoid this message, login as Oracle and add the read permission to /exlibris/app/oracle/product/920/lib/ldflags – “chmod 644 /exlibris/app/oracle/product/920/lib/ldflags”.
