

Replaced characters in XML-printout

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Description:

When we check the XML-files of printouts on the Aleph-server we see that character " is replaced by "
Why is this done? Are other characters replaced as well?

Resolution:

In XML data the following characters are not allowed: &<>" and they are replaced to: & , < , > , " , '
This is done hardcoded in the programs.
