## How to determine p\_manage\_18 order of conversion option

- **Article Type:** General
- **Product:** Aleph
- **Product Version:** 18.01

---

### Description:

when I run catalog-services-p\_manage\_18 I usually need character conversion ALEPH300\_TO\_UTF which is fairly far down the list. Any way I can move it to the top (or second after 'none')?

### Resolution:

The order of the character conversion options comes from column 1 of \$alephe\_unicode/tab\_character\_conversion\_line.

If you want ALEPH300\_TO\_UTF to be first then make it the first line in \$alephe\_unicode/tab\_character\_conversion\_line

---

## Additional Information

16.02, p\_manage\_18, character conversion
