  - **Product Version:** 18.01
- 

### Description:

Someone created a publication pattern and accidentally associated it to the admin library ABC50 instead of ABC60. How can one deleted it or reassociate it?

### Resolution:

There's no way to re-associate the publication pattern with the ABC60 record, but you can delete it. It should be represented in the ABC50 ADM record as an 85x field. If you just delete this field, it should remove the publication pattern.
