## Single URL w/logical bases setup for unique Syndetics code

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 19.01
- 

### Description:

#### Problem Description:

Sites with one URL for Web OPAC and using local bases to search individual libraries are unable to have unique syndetics codes in the URL

#### Actual Results:

Syndetics code is pulled from central `www_server.conf`

#### Expected Results:

A solution would exist as it did prior to rc 1871 (v.18) rc 464 (v.19)

#### Resolution:

Customer no longer requires syndectics.
