## UE-01 not updating indexes since Oracle was upgraded

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 16.02
- 

### Description:

We just realized that new and modified records are not being indexed since Oracle was upgraded on our production server on March 11. The latest run\_e\_01 log in /tcu01/scratch ends with the following error lines:

```
Oracle error: update_cursor1 z07  
ORA-03113: end-of-file on communication channel
```

```
Oracle error: update_cursor1 z07  
ORA-03114: not connected to ORACLE
```

```
* No ORACLE connection - process is terminated... *  
What should be done
```

### Resolution:

When aleph\_startup tried to start the ue\_01, Oracle was not available and the procedure stopped.

Do util e/1 to start ue\_01 and it is processing the Z07s successfully.

---

## Additional Information

ue\_01, ORA-03114 error
