
MetaLib KB Known Issues as of September, 12th, 2007

- **Article Type:** General
 - **Product:** MetaLib
 - **Product Version:** 4
-

Description:

Dear customers,

We would like to inform you regarding two known issues in the CKB resources:

1) NDLTD (CKB02212) : The native interface of this resource is currently down. We have notified OCLC regarding this problem.

2) All resources using the ELSEVIER_SCIRUS configuration : There is a problem with the presentation of the new author and citation fields, which also results in problems with the OpenURL being sent to SFX. We hope to fix these problems in the next CKB update.

Resolution:
