

Number of records in Nav Map

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 16.02
-

Description:

What is the limit of records that can be in the GUI Search Node Navigation Map at one time?

Resolution:

In v15 the limit was around 20.

From v16 it is 800. (But this can be constrained by PC memory.)

Note: The number of items shown for each title is limited by the setenv `pc_tree_view_max_branch` value in `$alephe_root/pc_server_defaults`.
