

Missing 'Get Order' search choice

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 18.01
-

Description:

In 15, we had a quick Get Order box in the menu to be able to quickly search on many different order indexes. This appears to be missing in 18. See screenshot. Is there something comparable to this Get Order box in version 18?

Resolution:

In version 18, to get a choice of indexes to search, you click on the Order Search icon in the Nav Tree on the left, and then click on the index dropdown in the right-hand screen. (See attached document showing this.)
