

## Public Execute Privileges

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 18.01
- 

### Description:

We've been notified by our DB admins that PUBLIC has execute privileges for several packages on both our production and test servers. For security reasons we need to revoke permissions for PUBLIC for the following packages:

- > DBMS\_LOB
- > DBMS\_JOB
- > UTL\_FILE
- > UTL\_SMTP
- > UTL\_TCP
- > UTL\_HTTP

If Aleph is taking advantage of PUBLIC to execute any of these packages we need to know what we can use in its place.

### Resolution:

Please ask them to grant execute privileges on the following packages to all of aleph applicative DB users:

- DBMS\_LOB
- DBMS\_JOB

With other packages there shouldn't be a problem.
