Question

Is there a setting to remove the automatic printing of receipts when pressing F4 (End Current Session) when using the option of "all loans on one receipt"? Staff prefer to use the Print Session button to double check loans before ending the current Session and don't need a second receipt to print out.

Answer

- * Staff can select "No receipts" in the GUI Circ Aleph -> Options -> Loan Options, and use the Print Session button instead.
- * There is no way to have "All loans on one receipt" checked and not have a receipt print at the end of the session.
