Description:

The circ_status x-service fails for bib records with large numbers of items.

Resolution:

The circ_status x-service fails for bib records with large numbers of items.

v19. rc 737

v20. rc 2088

A new X service was written : circ-stat-m which is identical to circ-status but uses a start point to retrieve "chunks" of 990 items. You can use it as the following example :

http://il-aleph02:8994/X?op=circ-stat-m&sys_no=000050337&library=usm01&start_point=00000001

and then

http://il-aleph02:8994/X?op=circ-stat-m&sys_no=000050337&library=usm01&start_point=000000990
