
Publication pattern for combined issues; combined enumeration

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Desired Outcome Goal:

Create a publication pattern which handles issues with combined numbers. (See the attachment for the referenced screenprints.)

The issues for a serial are published regularly, 10 issues a year whereas Jan./Feb. and Jul/Aug. are combined.

With the following publication pattern in ADM record ?

? I achieve the following (nearly what I want):

The only problem is that the issue no. is not combined (should be issue no. 1/2 and 7/8). Chronology J. is correct.

Procedure:

Add a subfield y (for ?ce? combined enumeration).
