

Overlay fails: "match_doc_gen could not parse parameter line"

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 16.02
-

Description:

In the oclc_server (or in other bib load) overlay is not occurring as it should. You see these messages in the oclc_server log:

Note : Looking for matching record....

Error : match_doc_gen could not parse parameter line. Why do I get this errors?

Resolution:

This message is due to the fact that this parameter (in tab_match_script_oclc, column 3) lacks a subfield value:.
TYPE=SYS,TAG=935;,SUBFIELD=.

It is uncertain whether this defect would prevent match on other (correct) lines.
