/exlibris/aleph/a20_1/illsv/scratch/run_e_17.16300: No such file or directory

Resolution:

Though you have an /exlibris/aleph/a20_1/illsv directory, there is no scratch directory under it.

The aleph_startup proc has the following lines:

```
if ($ISO_ILL == "Y") then  
echo "starting ue_17 ..."
```

Looking in aleph_start, we see:

```
setenv ISO_ILL Y
```

Since your library is not using ISO_ILL you should change this to "N".

Note: Since you are not using ncip, sru, or vst, you should also make certain the following setenv's are also "N":

```
setenv SRU_SERVER_STARTUP Y  
setenv NCIP_SERVER_STARTUP N  
setenv VST_SERVER_STARTUP N
```

Then do "source aleph_start" to make these changes take effect.
