
Diacritics and non-Latin characters in sublibrary and Collection codes

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Description:

Can diacritics or non-Latin characters be included in Aleph sublibrary and Collection codes?

If so, will a single diacritic in the sub library or collection code be considered as 2 characters?

Resolution:

We strongly suggest that sites *not* try using diacritics in these codes.
