

Procedure to run" in p_manage_01 Word index

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 16.02
-

Description:

The first field "Procedure to run" (update or delete) was removed from p_manage_01 => Do you know why?

Resolution:

In version 16.02 the p_manage_01 always does "delete"/"rebuild entire". I believe that the Update option was removed because of complications in performing Word updates.
