ITM and ITM1 don't work in Brief and Full displays

- **Article Type:** General
- **Product:** Aleph
- **Product Version:** 20, 21, 22, 23

Description:

We have ITM+ specified in the www_tab_short.eng and ITM1 in edit_doc_999.eng.
Neither works: the Location (Owned/Checked out) column is blank in the Brief and the "holdings(1)" is omitted in the Full.

Resolution:

ITM1 and ITM+ don't work with a sublibrary code in column 9 of tab_sub_library.eng. (Analysis shows that the tab_sub_library_single routine does not work with such a value.)

Changing the lines from this:

```

corrected the problem.
Note: It does also work with "ALEPH" in col. 10.
