

## CKB resource Alternative Name

- **Article Type:** General
  - **Product:** MetaLib
  - **Product Version:** 3
- 

### Description:

Lexis/Nexis cannot be searched if Lexis, Lexis Nexis or Lexis-Nexis is entered in the locate database name.

This is understandable since the title field is searched without truncation.

Most users are likely to use Lexis Nexis or Lexis-Nexis. So, is it possible to make the database searchable by Lexis Nexis or Lexis?

### Resolution:

We suggest adding "Lexis Nexis" and "Lexis-Nexis" to the fields "Alternative Name" on the "Presentation Secondary" tab in the IRD Subscription to enable such searches.
