 - **Product Version:** 16.02
-

Description:

In v16 fix 493 reinstated the set_result_set_limit.

When I looked in our www_server.conf file I did not see this setenv setting.

Does this mean that we do not have this rep_change in place?

Resolution:

The Implementation Notes for rep_change 493 say this:.

In order to change the limit of records that can be included in a result set, perform the following changes:.

1. Define the new set_result_set_limit variable in the ./alephe/www_server.conf and/or in the ./alephe/pc_server_defaults files as in the following sample:.

```
setenv set_result_set_limit 5000.
```

Note that the range can be set from 1000 up to 20000 records..

2. Change the following line in the ./alephe/www_f_ing/short-include-2 file:.

Records \$0100 -\$0200 of \$0300 (maximum display and sort is 1000 records).

To:.

Records \$0100 -\$0200 of \$0300 (maximum display and sort is \$4500 records)
