
Problem with XML from SFX - Primo pipe fails

- **Article Type:** General
 - **Product:** SFX
 - **Product Version:** 3
-

Description:

The Primo SFX pipe fails, because the SFX file contains data with invalid UTF characters.

In the log it appears as follows:

```
prefix=/exlibris/primo/p2_1/ng/primo/home/profile/publish/publish/production/pipes/uco_sfx/sfx/
```

```
2009.12.07-09.52.21-8955474/harvest/sfx.tar
```

```
2009-12-07 09:52:25,134 ERROR [t-SplitRecords] [c-RecordSplitter] - An exception occurred while splitting record. error message is java.io.UTFDataFormatException: Invalid byte 1 of 1-byte UTF-8 sequence.
```

```
2009-12-07 09:52:25,134 ERROR [t-SplitRecords] [c-RecordSplitter] - Failed to split record. record file name= sfx.xml  
javax.xml.transform.TransformerException: java.io.UTFDataFormatException: Invalid byte 1 of 1-byte UTF-8 sequence.
```

Resolution:

This issue is being fixed by the SFX team.
