 - **Product Version:** 19.01
-

Description:

On the Holdings/Items page in the OPAC, the Internet Link (856) repeats when there are multiple copies. Is there any way to have it only display once?

Resolution:

There isn't a way to prevent what you are seeing. What you can do is move the URL from the middle section of the page to the upper section of the page. To do this remove the 856 from edit_paragraph.eng and add URL to 013.
