
Importing MARC records from Harrassowitz

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Description:

Has anyone developed scripts etc for importing MARC records from Harrassowitz?

Resolution:

[From Kevin Collins, SUNY-Stony Brook, on the Global Aleph Users list:]

Please look in your /xxx01/import/ directory.

There should be a file labeled 'tab_96_def' or 'tab_yankee_def'.

The important thing would be to look at the fields layout in the example file, compared to the ExLibris document called:

"How to Load Records using the Generic Vendor Records Loader (file-96)"

Two other useful documents will be

tab_fix related docs in ExLibris 'Configuration Guide'

"How to Set Up a Script for the Correction of Records" in ExLibris's System Librarian Guide
