## Hot backup can be done only when running in archive mode"

- **Article Type:** General
  - **Product:** Aleph
- 

### Description:

The hot backup script generates the following email:

Subject: Backup error on : 26-11-2009 00:20:01 ora\_hot

Oracle DB: alephp

Backup type: ora\_hot

Message Number: 08

Hot backup can be done only when running in archive mode

libcat

Linux libcat 2.6.18-128.1.1.el5 #1 SMP Mon Jan 26 13:58:24 EST 2009 x86\_64 x86\_64 x86\_64 GNU/Linux

### Resolution:

It seems that the operation to correct the Insufficient privileges (KB 16384-21953) / the reboot of the server stopped archive logging for some reason. util o/7/3 showed:

SQL\*Plus: Release 11.1.0.7.0 - Production on Thu Nov 26 18:34:25 2009

Copyright (c) 1982, 2008, Oracle. All rights reserved.

idle> Connected.

idle> idle> Database log mode No Archive Mode <-----

Automatic archival Disabled <-----

<etc.>

so I turned it on (util o/7/1):

idle> Database closed.

Database dismounted.

ORACLE instance shut down.

...

...

Database mounted.

idle>

Database altered.

idle>

Database altered.

idle> Disconnected from Oracle Database 11g Enterprise Edition Release 11.1.0.7.0 - 64bit Production

With the Partitioning, OLAP, Data Mining and Real Application Testing options

Restarting Aleph servers and Aleph Daemons.

...

...

All done

Note: the preceding util o/7/1 will \*not\* work if the site is Two-Task, with a separate database server.
