## Assigning F12 to 'end current session' doesn't work

- **Article Type:** General
- **Product:** Aleph
- **Product Version:** 17.01

---

### Description:

In ver. 17.01 circulation when I assign 'end current session' to F12 using options/customize, the F12 key doesn't end the session when you press it. Is there some way we can make this work? This is on a Windows XP machine.

### Resolution:

Please see the explanation in Aleph User Guide (Acquisitions and Circulation sections):

The following shortcut keys are hard coded and cannot be customized:

All Lists - Print List F11

Date Edit and Time Edit - Reset Dates F12

Help F1

This applies to versions 16 and 17

---

## Additional Information

F12, shortcut keys
