Description:

How does one go about changing an Item Process Status from any status to a NULL value? I.E. from Shelving Cart [SH] to Not In Process [Null Value]. We know this can be performed through Items > Change Item Process Status, but we have quite a few and are attempting to do this with p_manage_62.

Resolution:

In order to change the processing status to Null or blank, use "ZZ" as the value in your "To Processing Status" parameter. The program translates that special code into a blank status. The same thing, actually, can be done with the "From Processing Status" parameter if you want it to change all records, regardless of current status.
